Call Congress During NRTW!

Call Congress to Support Project CARE

A Virtual March on Capitol Hill!

Take Action!

Be a part of a virtual march on Capitol Hill! During National Radiologic Technology Week (NRTW) thousands of health care professionals will be playing an important part in their profession by contacting lawmakers and asking them to cosponsor H.R. 583, the Consistency, Accuracy, Responsibility and Excellence (CARE) in Medical Imaging and Radiation Therapy bill.

ASRT and the Alliance for Quality Medical Imaging & Radiation Therapy believe the CARE bill will ensure that patients undergoing all types of medical imaging and radiation therapy procedures receive safe, high quality care while reducing the cost of these examinations and treatments.

In order for the CARE bill to be enacted it will be important for every medical imaging and radiation therapy professional to ask their lawmakers to cosponsor the CARE bill, so please take action now and call your congressman today!
