

North Carolina Society of Radiologic Technologists, Inc.
AN AFFILIATE OF THE ASRT

OCTOBER 2011 LEGISLATIVE UPDATE

The North Carolina Society of Radiologic Technologists, Inc. is working diligently with Representative Justin Burr to mitigate any remaining issues with the licensing of radiologic technologists and radiation therapy professionals in the State. Representative Burr in collaboration with the NCSRT, Inc. is organizing a committee of interested parties that will begin meeting in November to focus on remaining issues that have not already been mitigated by the State Society. The Legislative Committee of the NCSRT, Inc. in agreement with Representative Burr feels that it will take a minimal number of meetings to accomplish this task. It is our hope to have the bill reintroduced in May 2012.
